

SSH File Sharing

Pre-Installation

```
sudo apt install sshpass sshfs
```

Create a file in `/opt/seedbox.sh` (be sure to set the password):

```
#!/bin/bash  
sshpass -p <password> ssh -oHostKeyAlgorithms=+ssh-rsa $*
```

Add this line to `/etc/fstab` (note the location of `seedbox.sh`):

```
sshfs#psb29404@psb29404.seedbox.io:/files /media/seedbox fuse  
ssh_command=/opt/seedbox.sh,uid=1000,gid=1000,users,rw,idmap=user,x-  
systemd.automount,noatime,allow_other,auto_cache,reconnect,HostKeyAlgorithms=+ssh-rsa 0 0
```

Add this to `~/.ssh/config`:

```
Host psb29404.seedbox.io  
    PubkeyAcceptedAlgorithms +ssh-rsa  
    HostkeyAlgorithms +ssh-rsa
```

Run `sudo mount -a`
